

US cl.

Cl. 1 - Selective removal / extraction
of basic comp from phenols
contact w/ ^(aqueous) liquid or supercrit. fluid
(temp & press)
+
Single means for removing/recovering substances
from solvent (acid)

Cl. 18 sel. ext of nic.

Cl. 31 pretreatment w/ base
sel removal of basic comp. from certain
plant (contg acid salt)

- 46 - ^{to improve} nic. (pith. w/ base)

Called Ron

No input needed now on Canada

6/4/92

Check w/ Jim - - go with dis. on pretreatment
claims first -

- will review later - this process may
be important if odor contamination
of product can be reduced enough from
source (Allied) + scrubbers in plant
